# User Interview Summary

How often do you like studying alone?

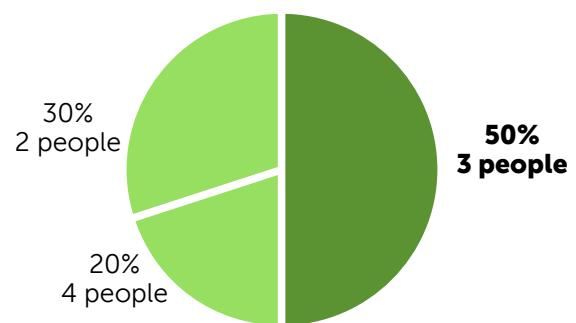

How often do you like studying with others?

How often would you study with others if it were easier to do so?

How many people do you study with when you study with others?

If you study with other people, how do you determine who to study with?

- › Smart people, people smarter than me
- › Friends in the same class
- › People in class, people in major, personality, friends, hang out with, smart people, same work habits
- › Friends, communicate well with
- › Goes at the same pace, on the same page in terms of the material, same study approach
- › People who have higher grades or same subjects, friends
- › Usually if it is class friends, "target the know-it-all"
- › Combo of what they bring to the table, and whether they get along or not
- › Same classes, same study habits

If you study with other people, how does it benefit you?

- › Talking through things, others might remember more
- › Different explanations
- › Easier, goes faster, more fun
- › Assures knowledge retention, motivation, more social
- › When I'm studying alone, it might go unanswered.
- › Understand how to approach the problem, work off of each other
- › Teach each other materials, better and more complete, if needs a different perspective
- › Think of something that I haven't thought of myself, design is interpreted another way
- › Things get finished quicker, better product, understand things more easily
- › See if they picked up on something I didn't

# User Interview Summary

Do you feel that it is more important to have many friends or a small group of close friends?

How do you take notes? (Online service, handwritten, laptop, etc)

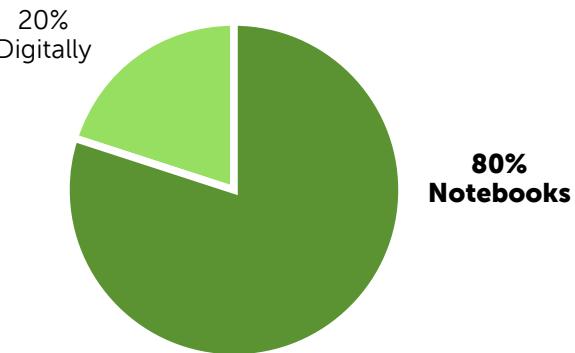

How willing are you to share your notes online with other people?

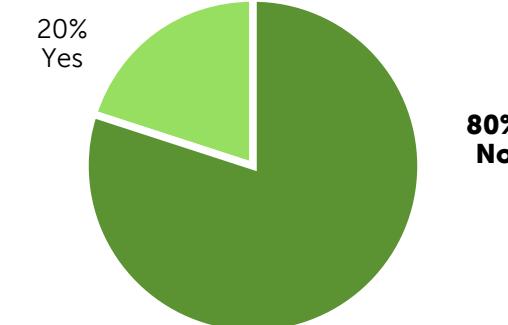

Are there any ways that you can think of to increase your incentive to share notes?

- › See other peoples notes, only if you share your own
- › Not really, no
- › Being able to connect to others, know the people IRL
- › Knew who they were going to, friends only though
- › Access to other's notes as well, give in, take out
- › No problem sharing notes, but a stigma about sharing them online, not physically handing them off
- › Online forum to post answers or questions, copy/distribute to friends
- › PAID, if sketching - getting constructive feedback, architect forum? mature audience
- › Not really
- › Law school is competitive grading, so it is tough to share

How do you store notes that you have taken?

Do you have any tutors?

# User Persona Matrix

Name Description	 <b>Grace Williams - Extrovert</b> <i>"Studying with fun sometimes. As long as we stay focused, we can gain a lot of information from one another."</i> Undergrad Economics WVU	 <b>Blair Jorn - Introvert</b> <i>"I'd prefer to work on my own, but constructive criticism is good for my work, and interpretations are good for learning art history."</i> Grad Student Architecture Pratt Institute	 <b>Li Chen - Admin</b> <i>"It's the social duty of experts to curate content on sites like Wikipedia. Those sites don't just happen without users helping it."</i> PhD Candidate Microbiology Georgetown
Study Habits	Most times she is working from the library or with books strewn about her bed. Grace likes studying with others, but the session has to be productive. She targets the "know-it-all" to get the most from her study sessions.	The desk in her room is the best place for her to draw in her sketchbook, but still be able to get more information from the internet about concepts Blair learned in class that week. When she is confused about material, she will IM with her classmates to see what they might have picked up.	Li studies like it is his job; mainly because it is. He prefers to study alone, and hates being bogged down by fellow students whom may not have taken the best notes, or paid the most attention in class.
Internet Usage	Grace loves Facebook, and mostly to check out the latest pictures from the party last weekend. She fires off comments without a second thought.	Blair likes Facebook, but she tends to be a "lurker" in terms of her interactions on it. Her true passion on the internet is XKCD and other online comics.	Wikipedia and other knowledge-based sites are what Li really enjoys. He would rather spend his free time learning about something new and useful.
Social Attributes	Nothing beats hanging out with her closest friends, but Grace does go to the big parties too. She never really has a problem with meeting new people, and she has the confidence to approach new situations.	Blair is a complete cinemaphile, and loves to go to the movies and critique amongst friends about what they just saw.	Going to a dinner party with a bottle of wine is what Li feels is the best way to spend his Saturday night. He loves the perspectives that his friends bring to conversations.
Academics	She is not the class valedictorian, but she is not the class dunce either. She has to spend a lot of time understanding the material, and feels that other students sometimes pick it up memorization and raw factual knowledge easier than her	One of the more talented designers in her class, Blair spends a great deal of time internalizing what she learns. Sometimes she lacks outside opinions to make a comparative argument during her essays on art history.	Li Chen did not get a PhD candidacy from poor academics. He is at the top of his class, but wants to help out others to get in a bit of networking. When he needs to crank out some studying he has no problem; just do not distract him.
Retention Areas	Grace loves the ability to tap into a collective knowledge of the current subjects that she is taking; which includes notes and ideas from StudyHall members in other schools. She is much more willing to upload her notes if there is a mutual sharing of notes from those who will look at hers. Grace also likes being able to see at a glance who is the smartest person in the room.	Blair wants to get people's opinions and criticism of her work, but she does not want to be ridiculed if someone has a negative opinion on her work. Being selective on the StudyHall members with whom she interacts with is a must have. She really likes to communicate with those whom she knows well and trusts their opinion. Her classmates are her friends, and she would love to get their thoughts before the next in-class critique.	Li enjoys helping others out, but only if they are not in it for just the easy way out. He believes that helping other StudyHall members with their problems helps him to understand the material and to assert to himself that he has a good grasp on it. However, Li only likes study sessions when he is working with people that are on the same level as him; he does not want to be bogged down by others who do not have the same work ethic.

## About Us

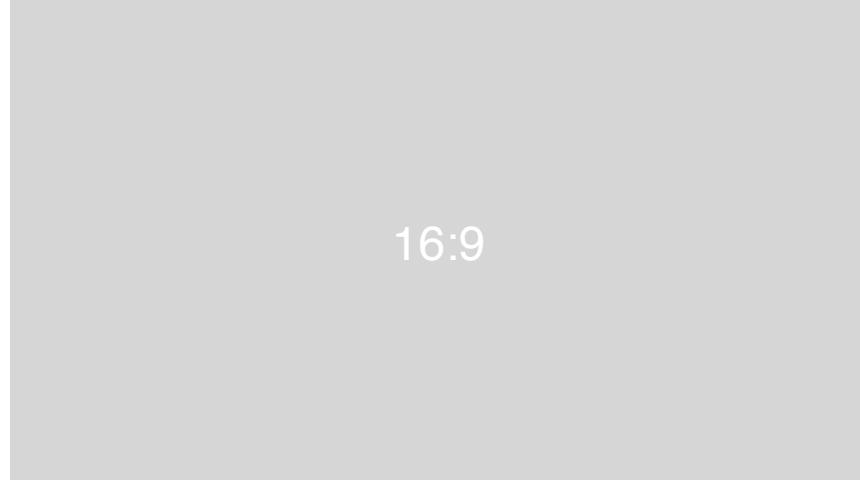

Completely impact multifunctional processes and wireless supply chains. Dynamically engage business meta-services for market-driven data. Collaboratively restore cross-platform users before client-centered manufactured products.

## Heading 2

Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean.

A small river named Duden flows by their place and supplies it with the necessary regelialia. It is a paradisematic country, in which roasted parts of sentences fly into your mouth.

Even the all-powerful Pointing has no control about the blind texts it is an almost unorthographic life One day however a small line of blind text by the name of Lorem Ipsum decided to leave for the far World of Grammar. The Big Oxmox advised her not to do so, because there were thousands of bad Commas.
